

Monitoring Alarms

Submittal
Data Sheet

Applications

AMAHW and AMLAHW Alarms are used to monitor contact closures, such as a float switch, and feature a red light and audible alarm. AMAHW Alarms have an automatic reset to silence; AMLAHW Alarms require a manual reset. Both are suitable for use as a stand-alone unit or as a remote alarm for another panel. Raintight enclosure allows both outdoor and indoor installation. UL listed.

General

Orenco AMAHW and AMLAHW Alarms can be used with dry contact switches to monitor liquid level or other contact closures. Both alarms are listed per UL 508; a UL-Canada listing is also available.

Standard Models

AMAHW, AMLAHW.
