

EZ SERIES® IN-SITE® CL

Data Logging Panel with Bluetooth®

Duplex Model Shown

In-Site to On-site Just Got Easier!

The EZ Series® In-Site® CL data logging control panel features **wireless Bluetooth® connection** for your smart device. Now there is no need to open the panel for configuration, viewing status or downloading data using the new **EZ InSite® Connect App**. The Bluetooth® module allows **safe and secure access** in all weather conditions to the control panel for quick and convenient configuration, viewing status or data download.

The panel utilizes the C-Level™ sensor for continuous level monitoring and records up to **4000 system events**, including pump run times, pump cycles, alarm conditions, HOA settings, power outages, service calls and more. The **In-Site® reporting software formulates system data for you**, creating reports quickly and easily so system conditions can be identified and corrected.

The new compact redesign (10" x 8" x 4") is ideal for residential applications. The innovative internal design of components and integral mounting tabs make installation quick and simple. Includes integral padlockable latch for added safety.

Single phase simplex or duplex models available; and can be easily converted to demand or timed dose in the field.

COMPONENTS

1. NEMA 4X wall mount enclosure for indoor/outdoor use
 2. Touch safe design/safety cover
 3. Integral padlockable latch
 4. Touch safe terminal blocks for easy field wiring
 5. Circuit breaker(s) provides pump power disconnect and branch circuit protection
 6. Red LED alarm beacon
 7. Tank level LED bar graph indication
 8. Pump Run LED indication and Manual Push to Run Buttons
 9. LED float status indication
 10. LED power status indication
 11. Integral mounting tabs
 12. Ground lug(s)
 13. Bluetooth® circuit board provides wireless connection
 14. Auxiliary alarm indication
- Not shown: Alarm horn and Test/Silence button
